SUMMARY

I am a skilled Software Engineer dedicated to creating useful software solutions to meet dynamic business and customer needs. I am experienced in project design and team collaboration/individual management. I am proficient in conceptual designs and product implementation support. I am ready and excited to apply my knowledge and experience to a dynamic new role in a fast-paced environment.

SKILLS

- Adobe Cloud, Basic Circuit Design, Java, C++, C, C#, Python, GitHub, Azure DevOps, Docker, MySQL, Shell Programming, Server & Client Construction, Mobile App Programming (Kotlin), HTML, CSS
- Strong leadership, communication skills, and critical thinking ability.
- Ability to work effectively independently and in a team environment.
- Hard worker, strong work ethic, and dedicated to the overall goal.

EXPERIENCE

SOFTWARE ENGINEERING INTERN

Wavetronix | Provo, Utah | May 2022 - Current

- Produced a Web App called Beta Site Data Viewer which collected and displayed traffic data that came from Wavetronix sensors placed throughout the country. Produced using C# and WPF.
- Constructed a database that stored the collected traffic data that came from Wavetronix sensors.
- Currently working on another Web App called Traffic Animator. This app simulates traffic to be displayed to users in order to help Wavetronix market and sell their sensors. I specifically worked on the frontend and backend of the project. This project was also developed using C# and WPF.
- Met with managers, vendors and others to solicit cooperation and resolve problems.
